

# WELCOME TO ASTROCAMP

## MORE THAN A FIELD TRIP!

We are excited that your child will be attending AstroCamp! Our goal is to make their trip one that they will remember for the rest of their life!

AstroCamp's science school program is designed to give students a hands-on experience that will teach scientific concepts in an exciting way. Students will explore the sciences of physics and astronomy, develop as individuals, and foster their sense of wonder.

Individual exploration and discovery are at the heart of AstroCamp's educational philosophy. In addition to its academic value, a major benefit of attending AstroCamp is the 'camp experience.' While camp is fun, energizing, and educational, it also teaches children practical life skills. By working in small teams to accomplish goals, they learn to get along with others in a group living situation and forge stronger friendships. The very nature of the experience encourages personal responsibility, initiative, and independence. Camp is an opportunity to develop character as children unplug, leave their comfort zones behind, and connect with the world around them.
